

"The stronger the antibiotic, stronger the outcome". For stronger outcome.....

Morcef-T

(Ceftriaxone + Tazobactam)

➔ *Offers extended anti-bacterial spectrum than ceftriaxone alone therapy*

- Effective even against ceftriaxone-resistant bacteria
- Reduces MICs of ceftriaxone by 8 times

➔ *Highly appreciable in both nosocomial infections and community-acquired infections*

➔ *Improves patient compliance*

- Pneumonia and other LRTIs
- ENT infections
- Typhoid and other intra-abdominal infections
- Skin and soft tissue infections
- Bone and joint infections
