

A "High profile" antibiotic is....

With Water  
For Injection

# Morcef inj.

(Ceftriaxone 250mg/500mg/1 gm)

A broad spectrum parenteral antibiotic  
with better therapeutic profile

*Displays feasibility in administration*

- Provides feasibility for both i.m. and i.v. use unlike other parenteral cephalosporins
- Also allows out-patient treatment unlike other parenteral cephalosporins
- Useful even in patients allergic to penicillins

Just a single dose (1gm) treatment  
for genital and pharyngeal infections

Indicated in:

- ENT infections
- Intra-abdominal infections
- Skin and soft tissue infections
- Bone and joint infections
- Pelvic inflammatory disorders
- Surgical prophylaxis

Also available : **Morcef-S 1.5 gm**

(Ceftriaxone 1000 mg + Sulbactam 500 mg inj.)

**For ceftriaxone-resistant  
bacterial infections**
