DOSAGE for Both

By I/M, Use only. (On alternate days)

Large Animal:

5ml per day for prophylaxis (prevention)

10 ml for treatment

Small Animal: 1 -2 ml

Advantage of Vitamin H (Biotin)

Vitamin H is a nitrogen - containing acid essential for growth and well - being in animals.

+

Vitamin H (Biotin): 12.5 mcg

- ⊙ It has 4 essential vitamins needed for animals (4 in 1 Injection).
- ⊙ It has osteogenic properties – bone growth and repair
- ⊙ Farm animals, specially stall fed animals need Vitamin D, since they are exposed to less sunlight.
- ⊙ Some animals do not exhibit growth and do not come to heat in time. ADVIT DE H – resolves this problem
- ⊙ Sesame oil used for better animal compliance

BOTH ARE AVAILABLE IN

10 ML vial

To bring animal to Heat

To maintain pregnancy
